

May 30, 2014

The Three Creeks Air Monitoring Subcommittee is pleased to share the Three Creeks Air Monitoring Data Review Report that has been prepared by Stantec. The Report includes Stantec's analysis and recommendations to enhance the effectiveness of air monitoring in the region.

The Subcommittee is preparing an Action Plan for continuous improvement of the air monitoring, based on the Stantec recommendations and also considering direction provided by the Alberta Energy Regulator from the regulatory proceeding. The Action Plan will be shared with the community when it is complete.

In the meantime, if there are questions about the Stantec report or about the work of the Three Creeks Air Monitoring Subcommittee, please feel free to contact our Facilitator, Karla Reesor ([karlareesor@movingfwd.ca](mailto:karlareesor@movingfwd.ca) or 403 807 2995).
